

Dressta TD-15M

£POA

-When we design a machine, we start with the operator and design everything around them. When the operator can see more, they can do more in safety. That's why Dressta machines are the benchmark for visibility of the blade, ripper, tracks, and jobsite.

-We use our engineering capability to deliver the maximum pushing power with machines that just keep on working. In our tough applications endurance is the key and we have machines that are

Product Details	
Category/Type	Dozers
Make	Dressta
Model	TD-15M
Year	18,900Kg - 22,800Kg
Hours	172Kw

-Visibility is one of our core values and is key to operator safety and productivity - the more you see the more you can do in safety.

Capital Valley Industrial Park Rhymney, Gwent, NP22 5PT

-With 33% more glass surface area, a tapered engine hood presenting clear sightlines to the blade corners, a rear-view camera, and additional top lighting it's easy to see how the TD-15M offers the very best allround visibility
