

Liugong 385B

£POA

The 375B/385B comes equipped with a fuelefficient Yammar EU Stage V engine that produces gross power of 49.9 kW (67 hp / 68 ps) - 53.7 kW (72 hp / 73 ps) at 2,400 rpm with high peak torque.

Two hydraulic systems: a closed circuit for driving and an open circuit for working. The driving circuit includes a highly efficient piston pump and a motor. The working circuit adopts pilot control; system flow reaches 18.3-31.8 gal/min (69-120 L/min).

Mono-block frame ensures excellent stability and increased strength. Trapezoid box frame of

Product Details

Category/Type	Skid Steer Loaders
Make	Liugong
Model	385B
Year	3,750 kg
Hours	53.7 kW

Adjustable seat with shnock absorption and optional high - grade seat provide utmost comfort to the operators. The cab is equipped with easy-pull and easy-secure side windows. Other options include radio with MP3.

Ergonomic low-effort pilot control joysticks reduce operator's fatigue. The switches on the joysticks control the bulk hydraulics by fingertips.
